August 28, 2017

emsCharts is Approved to Submit NEMSIS 3.4 Data in Pennsylvania

emsCharts is officially connected to submit NEMSIS 3.4 data in Pennsylvania

August 28, 2017 - Pittsburgh, PA – emsCharts, a leader in Electronic Patient Care Records (ePCR) and Fire Reporting for public safety professionals, is now officially connected and approved to submit NEMSIS 3 data to the State of Pennsylvania ahead of the September 1st deadline imposed on software vendors. For clarity:

“emsCharts is officially connected and approved to submit live NEMSIS v3.4 data to Pennsylvania.”

emsCharts, a subsidiary of Golden Hour, has been a national leader in NEMSIS compliance for the past 10-years. emsCharts helped lead NEMSIS Gold Certification (v2.2) many years ago. In addition, emsCharts has been approved for NEMSIS 3 submittals since August 2015. emsCharts has a great deal of experience sending NEMSIS 3 data to many States, including exporting multiple NEMSIS versions simultaneously for a single ePCR record. emsCharts is glad to add Pennsylvania to the growing lists of States that are certified.

“We are proud leaders in NEMSIS reporting throughout the country and are pleased to add Pennsylvania to our growing list of approved States for NEMSIS 3 reporting,” said Pete Goutmann, President & CTO of emsCharts. “We will remain committed experts in regulatory compliance as we continually enhance our product offerings in support of our thousands of customers who utilize the emsCharts service.”

About emsCharts

emsCharts is a leader in providing Electronic Patient Care Record (ePCR) software solutions to support public safety professionals both in the air and on the ground. A wholly owned subsidiary of Golden Hour, emsCharts provides a patented, fully integrated ePCR and Fire reporting system with an intuitive interface and HIPAA compliant infrastructure focused on a continuous commitment to program sustainability and growth.
